

**Liberty Announces Expansion of Its US Sales & Marketing Representation
---FOR IMMEDIATE RELEASE WEDNESDAY, OCTOBER 29th, 2008---**

Melbourne, Florida USA (October 29th, 2008) Liberty Aerospace, Inc. announced today the appointment of an expanded US sales and marketing organization, Liberty Aircraft USA, Inc. Formerly known as Liberty Southeast, Inc., Liberty Aircraft USA, Inc. will now represent the Liberty XL2 in most of the contiguous 48 states, Alaska and Hawaii.

Following the recent announcement by Liberty Aerospace of its European expansion through an alliance with Piper-Germany, this new strategic US partnership will expand Liberty's sales representation throughout America. This sales and marketing organization will be based out of Liberty Aircraft USA, Inc.'s brand new 33,000 Sq. Ft. facilities in Greensboro, NC and will have regional sales managers across the nation.

Liberty Aircraft USA, Inc.'s President, George Johnson, stated "To be chosen to represent the Liberty XL2 nationwide is a distinct honor. Given Liberty Aerospace's commitment to an excellent product, we are thrilled to be able to present such an aircraft on a national level. With economic conditions demanding the need for fuel efficient, modern aircraft, we feel that success in selling the XL2 to both the training and touring markets will be continued, as we have already experienced in the Southeastern US. Our regional sales managers will recruit Liberty Freedom Centers to help us market this new generation aircraft."

"George Johnson and his organization have not only shown great success in selling the Liberty XL2, but also have an established track record of over 30 years of experience in aircraft sales. We believe that they will represent a substantive network of sales professionals, and we look forward to this partnership with great expectation," said Liberty Aerospace, Inc.'s CEO, Keith Markley.

Sales of the modern, fuel efficient, eco-friendly Liberty XL2 have continued to increase both domestically and internationally, prompting continued expansion of Liberty's network of dealers across the world.

About Liberty Aerospace, Inc. –

Based in Florida's Space Coast, Liberty Aerospace, Inc. designs and manufactures general aviation aircraft and is the FAA Type 23 Certificate holder for the Liberty XL2. The XL2 aircraft is IFR certified and meets the specific requirements of flying schools and clubs while offering the private owner/operator a first-class touring aircraft. Well-known for its carbon fiber fuselage and modular construction, it is the first production aircraft powered by a piston engine equipped with a full authority digital engine control (FADEC), simplifying power management and providing greatly increased levels of safety, reliability and maintainability. These technological advances have allowed Liberty to deliver an aircraft benefiting from incredibly low operating costs, while remaining extremely fun to fly.
